

Maths GCSE

The GCSE Maths course is divided into four units: numbers, including fractions, decimals and percentages; algebra, including graphs, inequalities and equations; shape, space and measure, including geometry, the Pythagoras theorem, trigonometry, transformations and metric and imperial units; and handling data, including questionnaires, histograms, cumulative frequency, averages and probability.

You must be at least 19 years of age and should already have achieved GCSE Maths at grade 3 (D) or above. To be accepted on the course you must complete an on-line assessment and attend one of our information and assessment sessions where you will be asked to take a short evaluation test in order for us to assess the appropriate level for you. Enrolment will take place after the assessment

Entry Requirements

You must be at least 19 years of age and should already have achieved GCSE Maths at grade 3 (D) or above. To be accepted on the course you must complete an on-line assessment and attend one of our information and assessment sessions where you will be asked to take a short evaluation test in order for us to assess the appropriate level for you. Enrolment will take place after assessment.

What's Next

A full Level 2 programme (including English and Maths at A*-C) will entitle you to progress to one of our level 3 programmes.
