

Network Engineer Apprenticeship Standard

This Apprenticeship Standard is designed to provide you with qualified network engineers who can design, install, maintain and support communication networks within your organisation and give technical advice and guidance on network configuration, cloud, network administration and monitoring tools.

Ideal for:

Network Technician
Network Engineer
Systems Engineer
Network Administrator

Benefits for learners

Gaining industry recognised professional qualifications
Developing a wide range of skills that will increase your career potential
Support from industry experienced staff
Working with the British Computing Society

Delivery model: Training is delivered in the College

Duration: Minimum of 15 months

Qualification: Network +, Server + and Network Security

Components: English and maths functional skills Level 2

The apprenticeship will cover the following core areas:

Network design
Installing and configuring networks
Network systems and performance
Troubleshooting network issues
Diagnostics
Upgrades to network hardware, software and operating systems
Integrating network software
Interpreting technical specifications

End Point Assessment

The final, end point assessment is completed in the last few months of the apprenticeship. It is based on:

Portfolio of evidence – produced towards the end of the apprenticeship, containing evidence from real work

projects which have been completed during the apprenticeship
 Synoptic project - giving the apprentice the opportunity to undertake a business-related project over a one-week period away from the day to day workplace
 Employer reference
 interview - with an independent assessor, exploring what has been produced in the portfolio and the project as well as looking at how it has been produced
 Passing all units

An independent assessor (from the BCS) will assess each element of the end point assessment and will then decide whether to award successful apprentices with a pass, a merit or a distinction.

Entry Requirements

5 GCSEs A-C (9-4) including maths, English and a technology subject

2 A Levels (A2) one in a STEM subject or an IT apprenticeship at Level 3

What's Next

Upon completion, apprentices can also apply to be on the register of IT Technicians confirming SFIA Level 3 professional competence.
