

Construction

Ideal if: you would like an introduction to the construction industry and try a variety of construction skills with the aim of progressing towards an apprenticeship of Level 2 qualification.

You'll learn: brickwork, joinery, wall and floor tiling, construction operations, painting and decorating, carpentry, plastering, plumbing and electrical.

Expect: to develop your English and maths skills, as well as take part in work-related activities to enable progression on to a Level 2 qualification.

You'll love: our purpose-built construction centres, which will help you gain experience and grow your confidence.

This course is an introduction to the construction industry, allowing learners to access and experience a range of trade specific tasks. It is a fantastic opportunity for learners to progress either into an apprenticeship or our Level 2 Construction course.

Career options - Bricklayer, Carpenter, Plasterer, Maintenance operative.

You will need to provide your own safety boots to wear in the workshops. All other personal protective equipment (PPE) will be provided.

Entry Requirements

A minimum of three GCSEs at grades E or above, or Entry 3 in English and maths functional skills. (the new grade 2 is taken as equivalent to E grade)

What's Next

Now you have a better understanding of the different trades, you can progress on to a full time level 2 Construction course or an apprenticeship.
