Infrastructure Technician Apprenticeship Level 3

Delivered by Gloucestershire College

End Point Assessment

The final, end point assessment is completed in the last few months of the apprenticeship. It is based on:

- **Portfolio of evidence** – produced towards the end of the apprenticeship, containing evidence from real work projects which have been completed during the apprenticeship, usually towards the end, and which, taken together, cover the totality of the standard, and which is assessed as part of the end point assessment
- **Synoptic project** - giving the apprentice the opportunity to undertake a business-related project over a one-week period away from the day to day workplace
- **Employer reference**
- **Interview** - exploring what has been produced in the portfolio and the project as well as looking at how it has been produced

An independent assessor (from the BCS) will assess each element of the end point assessment and will then decide whether to award successful apprentices with a pass, a merit or a distinction.

Components

- English and maths Functional Skills Level 2

Unit	Overview
CompTIA A+	Held by over 1 million IT professionals worldwide, CompTIA A+ is the most essential IT certification for establishing an IT career. If you're new to the IT industry, this will help you put your best foot forward. And if you're already an IT professional, the CompTIA A+ certification validates your skills and can boost your career.
Microsoft Certification: Install and configure Windows 10 (70-698)	Learn to install and configure Windows 10 as you prepare for Microsoft's 70-698 exam. Exam 70-698 is the first of two exams for the MCSA certification. Addressing local and desktop deployments, these topics form the foundation of what's to come. This course gives you the tools you need along with expert content so you can build the essential knowledge base and master the key concepts. This is one of two exams toward obtaining your MCSA.
